THE INSTITUTE OF MANAGEMENT SCIENCES

Officers and Council for 1962

Council Chairman
MURRAY A. GEISLER
The RAND Corp.
1700 Main Street
Santa Monica, Cal.

President
C. WEST CHURCHMAN
School of Business Admin.
University of California
Berkeley 4, Cal.

President-Elect
KENNETH J. ARROW
Serra House
Stanford University
Stanford, Cal.

Vice President
HARRY M. MARKOWITZ
The RAND Corp.
1700 Main Street
Santa Monica, Cal.

Vice President
MICHEL VERHULST
170 Ave. Paul Doumer
Rueil-Malmaison (S & O)
France

Vice President
ERNEST KOENIGSBERG
C-E-I-R, Inc.
345 Howard Street
San Francisco 5, Cal.

Vice President
RICHARD M. CYERT
Grad. School of Indust. Admin.
Carnegie Inst. of Technology
Pittsburgh 13, Pa.

Vice Chairman
WRAY SMITH
Institute of Science & Technology
University of Michigan
Ann Arbor, Michigan

Secretary-Treasurer
TIBOR FABIAN
Mathematica
76 Nassau Street
Princeton, N.J.

Associate Secretary
E. LEONARD ARNOFF
Ernst & Ernst
Union Commerce Bldg.
Cleveland 14, Ohio

Council Member
HENRI THEIL
Econometric Institute
Pieter de Hoochweg 122
Rotterdam 6, Netherlands

Council Member
MARCEL P. BOITEUX
Electricite de France
2 Rue Louis Murat
Paris 8, France

Council Member
GEORGE MORTON
London School of Economics
Aldwych
London, W.C.2, England

Executive Director, HAROLD H. CAUVET, Box 273, Pleasantville, N. Y.

MANAGEMENT SCIENCE

Editor-in-Chief, ROBERT M. THRALL, University of Michigan, P. O. Box 626, Ann Arbor, Michigan

Editors:
E. LEONARD ARNOFF, Ernst & Ernst, Union Commerce Bldg., Cleveland 14, Ohio
EDWARD BARANKIN, University of California, Berkeley 4, Cal.
E. M. L. BEALE, C-E-I-R (UK) LTD., Turriff House, Brentford, Mddx., England
MARTIN J. BECKMANN, Universität Bonn, Bonn, Germany (May to January)
Brown University, Providence 12, R.I. (February to April)
ROBERT L. CHAPMAN, RAMO-WOOLDRIDGE, 8433 Fallbrook Ave., Canoga Park, Cal.
A. CHARNES, Northwestern University, Evanston, Illinois
C. WEST CHURCHMAN, School of Bus. Admin., Univ. of California, Berkeley 4, Cal.
WILLIAM W. COOPER, Carnegie Institute of Technology, Pittsburgh 13, Pa.
GEORGE J. FEENEY, COWLES FOUNDATION, Box 2125, Yale Sta., New Haven, Conn.
MURRAY A. GEISLER, The RAND Corp., 1700 Main St., Santa Monica, Cal.
MORTON KLEIN, Columbia University, New York 27, N. Y.
HANS P. KÜNZI, University of Zurich, Zurich, Switzerland
SEBASTIAN B. LITTAUER, Industrial Engineering, Columbia University, New York 27, N. Y.
ALAN S. MANNE, Graduate School of Business, Stanford University, Stanford, Cal.
ROY RADNER, Department of Economics, University of California, Berkeley 4, Cal.
PHILBURN RATOOSH, 113 South Hall, University of California, Berkeley 4, Cal.
W. ALLEN SPIVEY, School of Business Admin., University of Michigan, Ann Arbor, Mich.
HENRI THEIL, Econometric Institute, Rotterdam, The Netherlands
ANDREW VAZSONYI, THOMPSON RAMO WOOLDRIDGE, Inc., Canoga Park, Cal.
MICHEL VERHULST, 170, Avenue Paul Doumer, Rueil-Malmaison, Seine-et-Oise, France

Published quarterly by The Institute of Management Sciences at Mt. Royal and Guilford Avenues, Baltimore 2, Maryland.

Business correspondence and advertising should be sent to the Business Manager, HAROLD H. CAUVET, P. O. Box 273, Pleasantville, New York, U.S.A.

Subscriptions, memberships and changes of address should be sent to the Institute at P. O. Box 626, Ann Arbor, Michigan, U.S.A.

Subscription price per year $8.00 for members, $10.00 for non-members. Back numbers at $2.50 each.

Reduced membership rate of $5.00 per year, all of which applies to a subscription, available to students, members of the Armed Forces and individuals outside North America.

Library of Congress Catalog Card No. 56-21107. *Printed by the Waverly Press, Inc.*

Second class postage paid at Baltimore, Md.

INDEX TO VOLUME 8

Authors

ALDERSON, WROE, CHURCHMAN'S *Prediction and optimal decision:* Book Review, 375.

——, AND SHAPIRO, STANLEY J., HEIN'S *An introduction to electronic data processing for business:* Book Review, 109.

ALLEN, S. G., Computation for the redistribution model with set-up charge, 482.

——, A redistribution model with set-up charge, 99.

ARONOFSKY, J. S. AND WILLIAMS, A. C., The use of linear programming and mathematical models in underground oil production, 394.

ASIMOW, MORRIS AND SPROWLS, R. CLAY, A model of customer behavior for the task manufacturing corporation, 311.

BASS, BERNARD, M., McGEHEE and THAYER'S *Training in business and industry:* Book Review, 372.

BECKMANN, MARTIN, An inventory model for arbitrary interval and quantity distributions of demand, 35.

BELLMAN, RICHARD, KIPINIAK'S *Dynamic optimization and control, a variational approach:* Book Review, 374.

BOOT, J. C. G., Notes on quadratic programming: the Kuhn-Tucker and Theil-Van de Panne conditions, degeneracy, and equality constraints, 85.

——, On trivial and binding constraints in programming problems, 419.

BOUBLI, ELIE J., ARMOUR RESEARCH FOUNDATION'S *Proceedings of the 1959 computer applications symposium:* Book Review, 110.

BOVAIRD, R. L., GOLDMAN, A. S., AND SLATTERY, T. B., Concepts in operational support research, 113.

BUFFA, ELWOOD S. AND REISMAN, ARNOLD, A general model for investment policy, 304.

CHARNES, A. AND COOPER, W. W., On some works of Kantorovich, Koopmans and others, 246.

CHENG, PAO LUN, Optimum bond portfolio selection, 490.

COOPER, W. W. AND CHARNES, A., On some works of Kantorovich, Koopmans and others, 246.

CYERT, R. M., DAVIDSON, H. J., AND THOMPSON, G. L., Estimation of the allowance for doubtful accounts by Markov chains, 287.

DAVIDSON, H. J., THOMPSON, G. L., AND CYERT, R. M., Estimation of the allowance for doubtful accounts by Markov chains, 287.

DECANI, JOHN, S. A queueing model for business students, 278.

FOREHAND, GARLIE A. AND GUETZKOW, HAROLD, Judgment and decision-making activities of goverment executives as described by superiors and co-workers, 359.

GEISLER, MURRAY A., Appraisal of laboratory simulation experiences, 239.

——, BASS' *Mathematical models and methods in marketing:* Book Review, 528.

——, FEIGENBAUM'S *Total quality control-engineering and management:* Book Review, 529.

GOLDMAN, A. S., SLATTERY, T. B., AND BOVAIRD, R. L., Concepts in operational support research, 113.

GOOD, I. J., How rational should a manager be?, 383.

GUETZKOW, HAROLD AND FOREHAND, GARLIE A., Judgment and decision-making activities of government executives as described by superiors and co-workers, 359.

HADLEY, G., Generalizations of the optimal final inventory model, 454.

——, AND WHITIN, T. M., A family of dynamic inventory models, 458.

HELLER, JACK AND LOGEMANN, GEORGE, An algorithm for the construction and evaluation of feasible schedules, 168.

HOGGATT, AUSTIN C., McCRACKEN'S *A guide to FORTRAN programming:* Book Review, 235.

HOMER, EUGENE D., A generalized model for analyzing management information systems, 500.

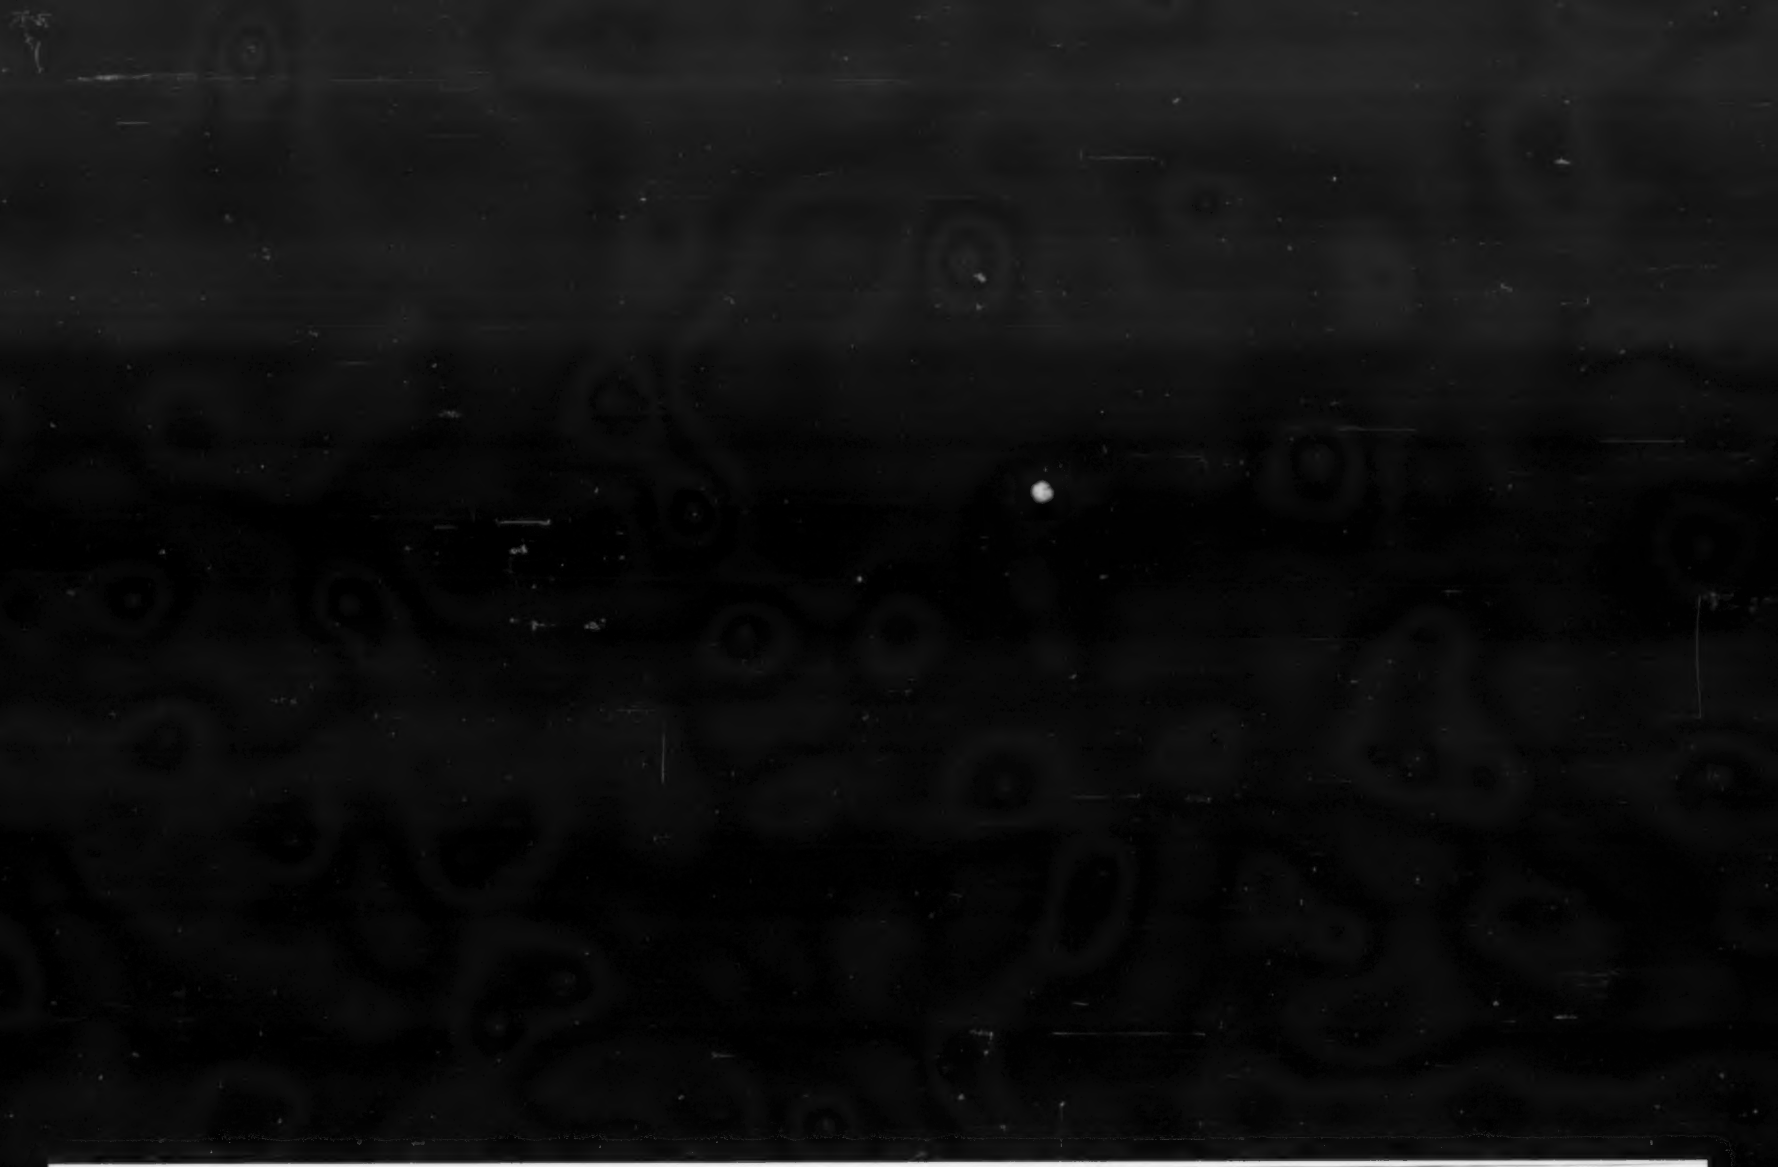
ISBELL, J. R. AND MARLOW, W. H., On an industrial programming problem of Kantorovich, 13.

JACKSON, JAMES R., Queues with dynamic priority discipline, 18.

JASTRAM, ROY., EELS and WALTON'S *Conceptual foundations of business:* Book Review, 371.
JEWELL, WILLIAM S., A filing problem, 210.
KILBRIDGE, MAURICE, A model for industrial learning costs, 516.
——, AND WESTER, L., The balance delay problem, 69.
KOENIGSBERG, ERNEST, COX and SMITH'S *Queues:* Rook Review, 373.
——, A short note on SANS, 201.
KOOPMANS, TJALLING C., On the evaluation of Kantorovich's work of 1939, 264.
LEMKE, C. E., A method of solution for quadratic programs, 442.
LOGEMANN, GEORGE AND HELLER, JACK, An algorithm for the construction and evaluation of feasible schedules, 168.
MALM, F. T., NEWMAN and SUMMER'S *The process of management—concepts, behavior, and practice:* Book Review, 530.
MARLOW, W. H. AND ISBELL, J. R., On an industrial programming problem of Kantorovich, 13.
MCKENNEY, JAMES L., Simultaneous processing of jobs on an electronic computer, 344.
MILLS, HARLAN D., Inventory valuations—an analytic technique, 58.
NASLUND, BERTIL AND WHINSTON, ANDREW, A model of multi-period investment under uncertainty, 184.
PLATT, WILLIAM J., Education—rich problems and poor markets, 408.
REISMAN, ARNOLD AND BUFFA, ELWOOD S., A general model for investment policy, 304.
RICHMOND, SAMUEL B., BAUMOL'S *Economic theory and operations analysis:* Book Review, 380.
SHAPIRO, STANLEY J. AND ALDERSON, WROE, HEIN'S *An introduction to electronic data processing for business:* Book Review, 109.
SHUBIK, MARTIN, Incentives, decentralized control, the assignment of joint costs and internal pricing, 325.
——, Some experimental non-zero sum games with lack of information about the rules, 215.
SIMONS, EDGAR, A note on parametric linear programming, 355.
SLATTERY, T. B., BOVAIRD, R. L., AND GOLDMAN, A. S., Concepts in operational support research, 113.
SPROWLS, R. CLAY AND ASIMOW, MORRIS, A model of customer behavior for the task manufacturing corporation, 311.
SYMONDS, G. H., Stochastic scheduling by the horizon method, 138.
TEAL, GILBERT, LYSAUGHT'S *Programmed learning:* Book Review, 371.
THOMPSON, G. L., CYERT, R. M., AND DAVIDSON, H. J., Estimation of the allowance for doubtful accounts by Markov chains, 287.
WEISS, GEORGE H., A problem in equipment maintenance, 266.
WESTER, L. AND KILBRIDGE, M., The balance delay problem, 69.
WHINSTON, ANDREW AND NASLUND, BERTIL, A model of multi-period investment under uncertainty, 184.
WHITIN, T. M. AND HADLEY, G., A family of dynamic inventory models, 458.
WILKINS, LESLIE T., Management science and research in Great Britain, 1.
WILLIAMS, A. C. AND ARONOFSKY, J. S., The use of linear programming and mathematical models in underground oil production, 394.
WINTERS, PETER R., Constrained inventory rules for production smoothing, 470.

Articles

Algorithm for the construction and evaluation of feasible schedules, An. JACK HELLER AND GEORGE LOGEMANN, 168.
Appraisal of laboratory simulation experiences, MURRAY A. GEISLER, 239.
Balance delay problem, The. M. KILBRIDGE AND L. WESTER, 69.
Book Reviews:
ARMOUR RESEARCH FOUNDATION *Proceedings of the 1959 computer applications symposium*, by ELIE J. BOUBLI, 110.
BASS' *Mathematical models and methods in marketing*, by MURRAY A. GEISLER, 528.
BAUMOL'S *Economic theory and operations analysis*, by SAMUEL B. RICHMOND, 380.
CHURCHMAN'S *Prediction and optimal decision*, by WROE ALDERSON, 375.

COX and SMITH'S *Queues*, by E. Koenigsberg, 373.
EELLS and WALTON'S *Conceptual foundations of business*, by Roy W. Jastram, 371.
FEIGENBAUM'S *Total quality control-engineering and management*, by Murray A. Geisler, 529.
HEIN'S *An introduction to electronic data processing for business*, by Wroe Alderson and Stanley J. Shapiro, 109.
KIPINIAK'S *Dynamic optimization and control, a variational approach*, by Richard Bellman, 374.
LYSAUGHT'S *Programmed learning*, by Gilbert Teal, 371.
McCRACKEN'S *A guide to FORTRAN programming*, by Austin C. Hoggatt, 235.
McGEHEE and THAYER'S *Training in business and industry*, by Bernard M. Bass, 372.
NEWMAN and SUMMER'S *The process of management—concepts, behavior, and practice*, by F. T. Malm, 530.
Books Received, 112, 236, 382, 532.
Computation for the redistribution model with set-up charge, S. G. Allen, 482.
Concepts in operational support research, R. L. Bovaird, A. S. Goldman, and T. B. Slattery, 113.
Constrained inventory rules for production smoothing, Peter R. Winters, 470.
Education—rich problems and poor markets, William J. Platt, 408.
Equipment maintenance, A problem in. George H. Weiss, 266.
Estimation of the allowance for doubtful accounts by Markov chains, R. M. Cyert, H. J. Davidson, and G. L. Thompson, 287.
Evaluation of Kantorovich's work of 1939, On the. Tjalling C. Koopmans, 264.
Experimental non-zero sum games with lack of information about the rules, Some. Martin Shuubik, 215.
Family of dynamic inventory models, A. G. Hadley and T. M. Whitin, 458.
Filing problem, A. William S. Jewell, 210.
General model for investment policy, A. Arnold Reisman and Elwood S. Buffa, 304.
Generalizations of the optimal final inventory model, G. Hadley, 454.
Generalized model for analyzing management information system, A. Eugene D. Homer, 500.
How rational should a manager be? I. J. Good, 383.
Incentives, decentralized control, the assignment of joint costs and internal pricing, Martin Shubik, 325.
Industrial programming problem of Kantorovich, On an. J. R. Isbell and W. H. Marlow, 13.
Inventory model for arbitrary interval and quantity distributions of demand, An. Martin Beckmann, 35.
Inventory valuations—an analytic technique, Harlan D. Mills, 58.
Judgment and decision-making activities of government executives as described by superiors and co-workers, Garlie A. Forehand and Harold Guetzkow, 359.
Kantorovich, Koopmans and others, On some works of. A. Charnes and W. W. Cooper, 246.
Linear programming and mathematical models in underground oil production, The use of. J. S. Aronofsky and A. C. Williams, 394.
Management science and research in Great Britain, Leslie T. Wilkins, 1.
Model for industrial learning costs, A. Maurice Kilbridge, 516.
Model of customer behavior for the task manufacturing corporation, A. R. Clay Sprowls and Morris Asimow, 311.
Model of multi-period investment under uncertainty, A. Bertil Naslund and Andrew Whinston, 184.
Optimum bond portfolio selection, Pao Lun Cheng, 490.
Parametric linear programming, A note on. Edgar Simons, 355.
Quadratic programming: the Kuhn-Tucker and Theil-Van de Panne conditions, degeneracy, and equality constraints, Notes on. J. C. G. Boot, 85.
Quadratic programs, A method of solution for. C. E. Lemke, 442.
Queueing model for business students, A. John S. DeCanni, 278.


Queues with dynamic priority discipline, JAMES R. JACKSON, 18.
Redistribution model with set-up charge, A. S. G. ALLEN, 99.
SANS, A short note on. ERNEST KOENIGSBERG, 201.
Simultaneous processing of jobs on an electronic computer, JAMES L. MCKENNEY, 344.
Stochastic scheduling by the horizon method, G. H. SYMONDS, 138.
Trivial and binding constraints in programing problems, On. J. C. G. BOOT, 419.
